

Uncertain road ahead.

Calling Explorers.

The post-pandemic world needs brave and innovative thinkers to face up to the challenges coming its way. **Are you ready to take them on?**

Tata Global
Internships

Every problem is an opportunity, and we got it twice.

In the 1896 Bubonic plague, we played an active role in fighting the pandemic. Our companies have risen to the challenge again. Like Jaguar Land Rover, which is using its 3D printing expertise to make face shields, or Tata Medical and Diagnostics, which has designed a highly accurate testing kit in under 100 days.

Join hands as we hit the road again.

We are looking for bright minds to take the tradition of exploration forward. Here are some of the program highlights:

- Solve real-world challenges
- Enjoy Indian cultural experiences
- Work in diverse industries - from automotive to A.I.
- Experience Tata's socially responsible culture

Stay agile for stiff challenges.

Make a tangible difference by working on important problems facing our companies.

Some of the exciting projects the batch of 2020 worked on:

Analytics

Identify and develop real-life machine learning based analytics solutions.

Corporate finance

Assess investment opportunities in the digital healthcare technology space.

Brand story

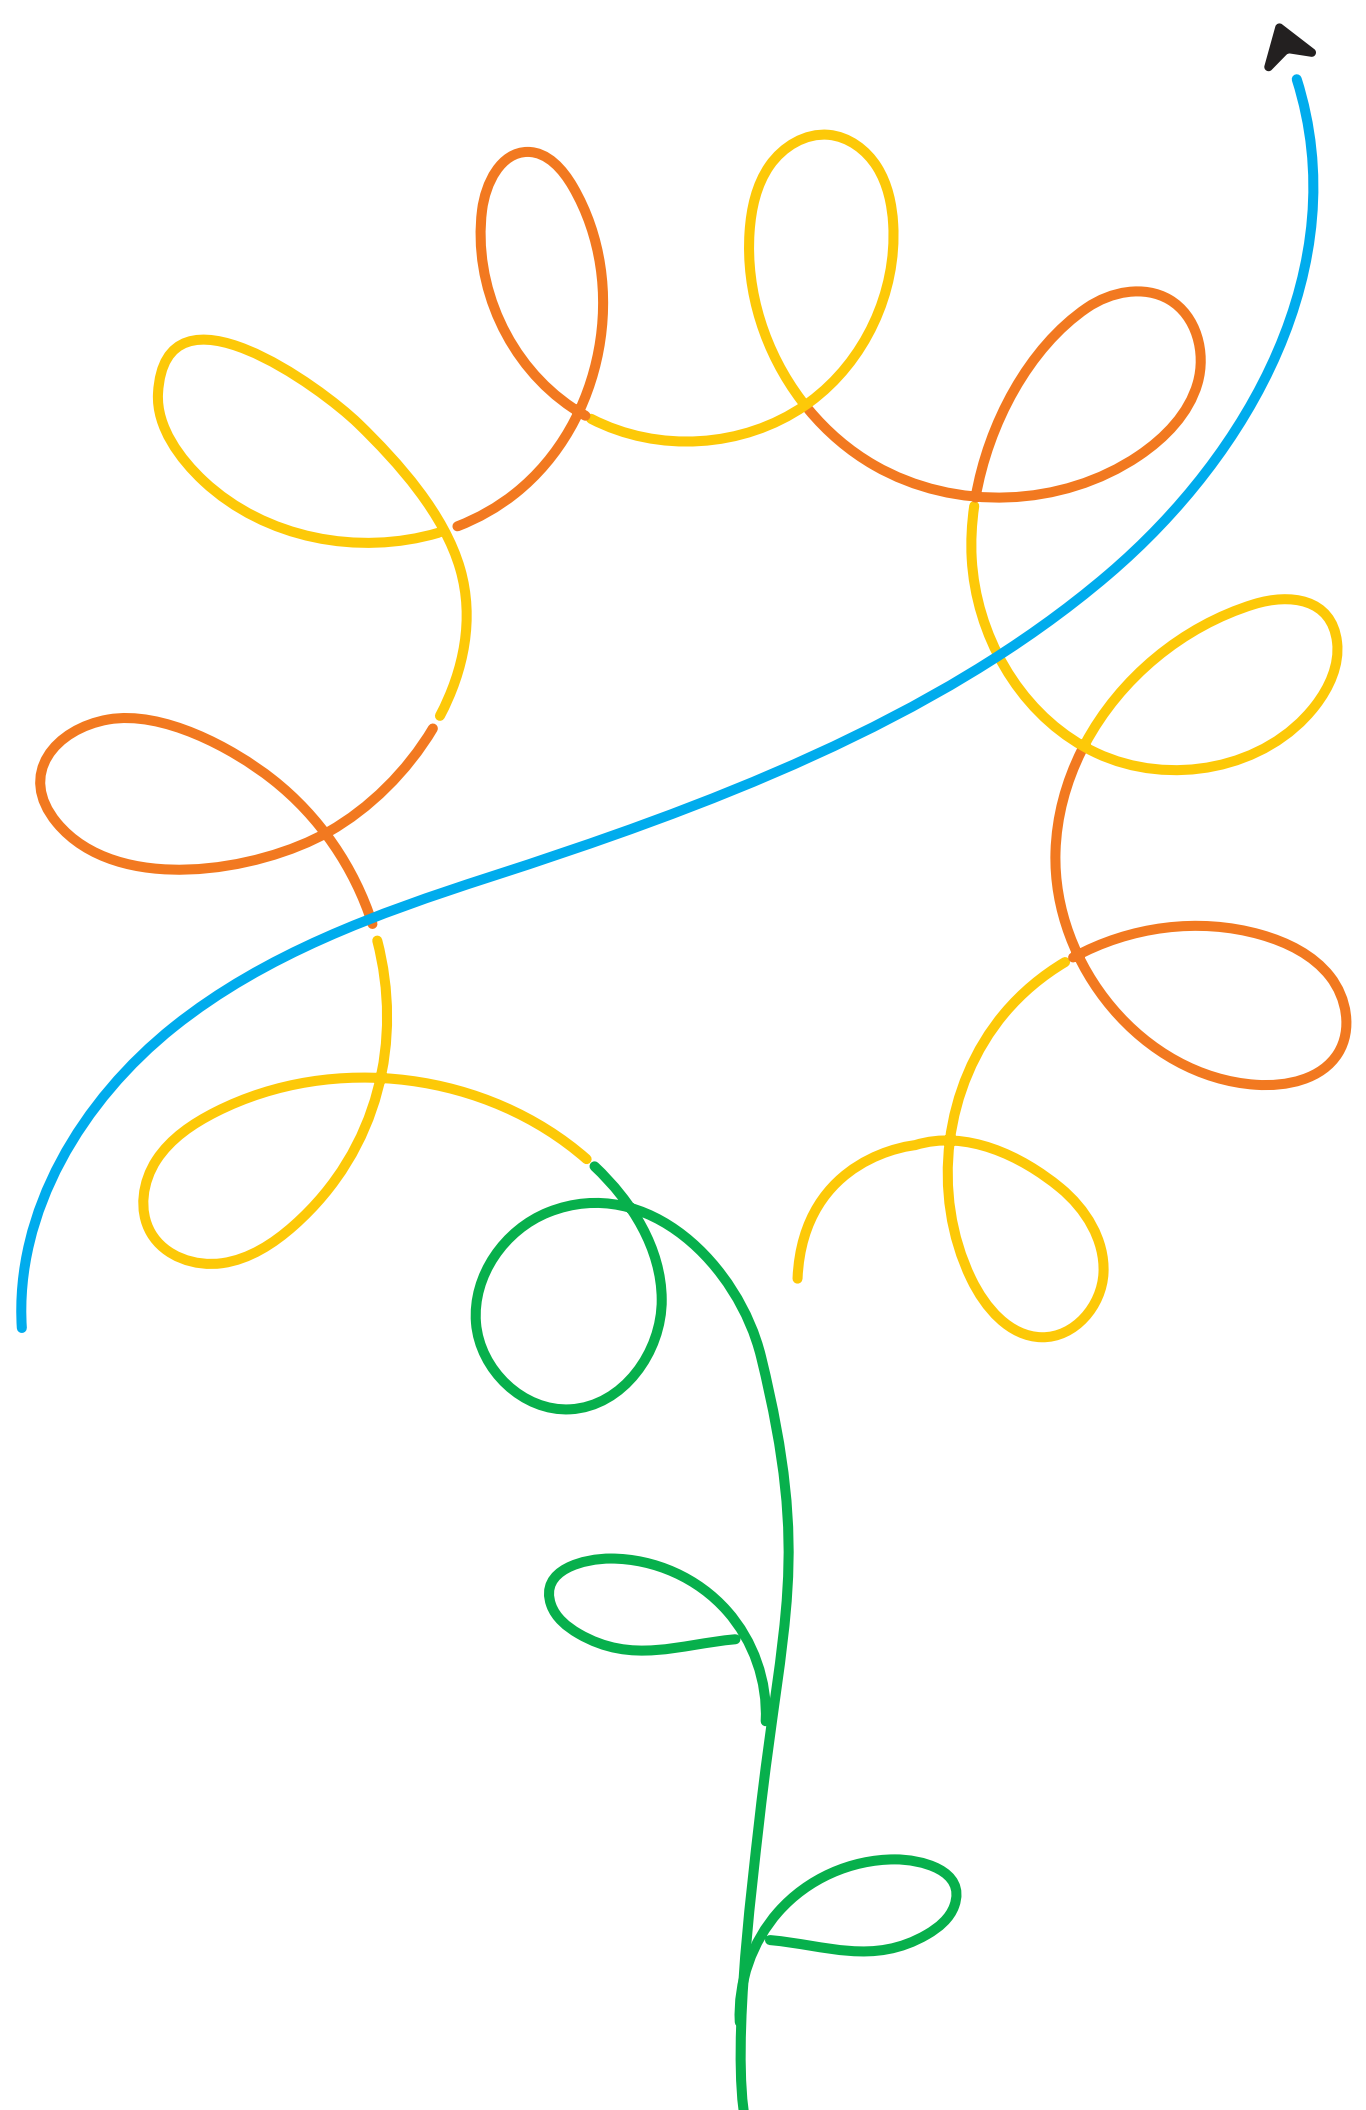

Craft the identity and brand story for consumers, to reflect the company's values and interests.

Digital transformation

Work on QSR digitisation - for a better consumer experience.

Consulting

Create a strategy and roadmap for the implementation of electric vehicles in India.

Not a dull moment on this journey.

No two weeks of your internship will feel the same. Here are some of the exciting activities planned:

Mentoring sessions

One-on-one sessions with mentors of your choice, from any of the group companies.

Bonding with peers

Games and activities, like Person Roulette, that help you build lifelong friendships.

Experience Indian culture

Get a taste of India with fun sessions in Yoga, Bollywood dance, and more.

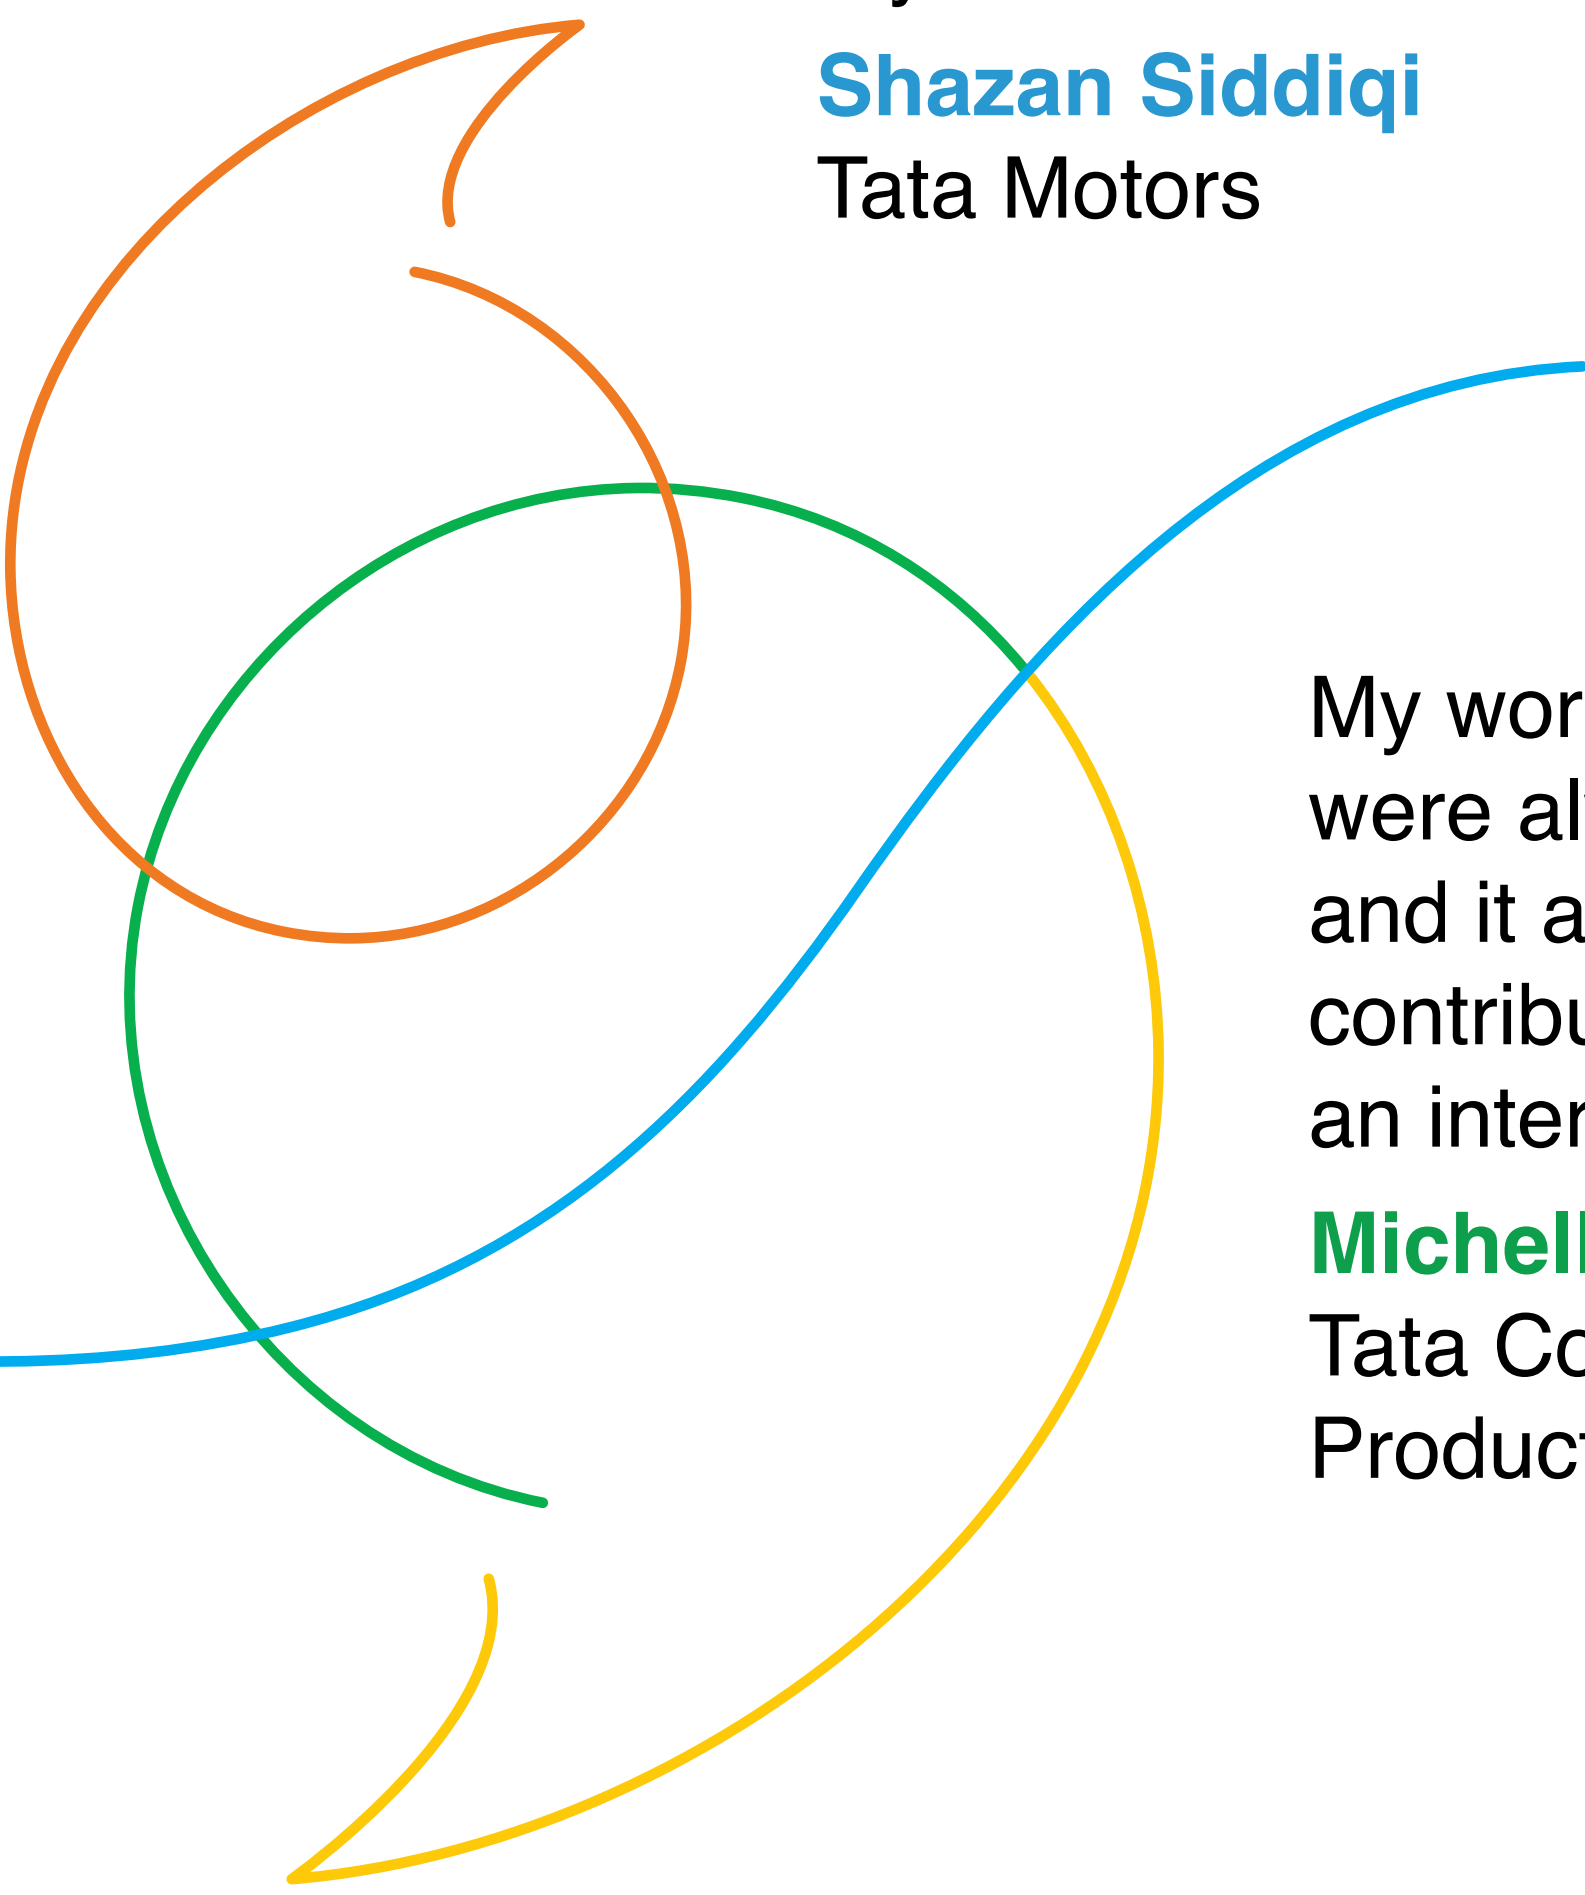

Batch 2020

Intern testimonials

I have newfound industrial knowledge that will surely help me progress in my career... has made me realise where I see myself in the future.

Shazan Siddiqi

Tata Motors

My work and thoughts were always welcomed and it actually felt like a contribution and not just an intern's point of view.

Michelle Lui

Tata Consumer Products Ltd.

Felt welcomed and supported from day one. I've grown to admire and respect the TATA brand and history even more.

Patricio Zirion Rivera

IHCL
